### Summary

The study was conducted to determine the Perception on Implementation of Anti-Muffler Modification Ordinance, challenges encountered during the implementation of anti muffler modification ordinance and problems occurred during the implementation. The study involved 30 selected drivers in the vicinity of Dumingag.

The study used the descriptive-survey method with the questionnaire-checklist as the main tool in gathering needed data. Descriptive statistics was used to analyze and interpret the data. Results showed that modified muffler ordinance decrease noise pollution, provides safe and sound environment and reduces traffic and road accident. Furthermore, it was shown that hardheaded drivers, lack of awareness among drivers, driving without license, lack of manpower to fully implement, lack of cooperation among

drivers dissemination about the ordinance and lack of cooperation among drivers.

Finally, the study recommends that the local officials continue and strengthen in the implementation of anti auffier modification ordinance; that the drivers abide to the ordinance formulated by the local officials and to maintain the reduction of noise pollution; and that another study may be conducted with an increased number of variables,
